

2025 PRODUCT LIST

Indigenous Products of Africa - All Natural & NON GMO

Regenerative Agriculture, Human Development, Economic Empowerment

With lands in West Africa (Yorubaland), East Africa (Busoga Kingdom), and Egypt, we are establishing Agrarian systems and utilize the Seventh-Generation principle. Leveraging modern technology, we are transforming lands, driving transparency and showcasing nature at its finest. Working in-tune with the lands and indigenous communities, we implement acreages of botanicals deemed fit. Having operating registered entities and expanding relationships across countries provides unique opportunities to secure natural based supply chains (Herbal & Food Sovereignty) from the fertile lands of Africa.
